[Inject Hard Drive Controller Driver In Server 2003](#)

A problem has been detected and windows has been shut down to prevent damage to your computer.

If this is the first time you've seen this stop error screen, restart your computer. If this screen appears again, follow these steps:

Check for viruses on your computer. Remove any newly installed hard drives or hard drive controllers. Check your hard drive to make sure it is properly configured and terminated. Run CHKDSK /F to check for hard drive corruption, and then restart your computer.

Technical information:

*** STOP: 0x0000007B (0xFFFFF880009AE7E8, 0xFFFFFFFFC0000034, 0x0000000000000000, 0x0000000000000000)

There is a utility called Driver Injection Which can be used from Sep 6, 2012 - Injecting RAID drivers into Win Server 2003 R2 installation.. HAL options after Windows XP or Windows Server 2003 Setup; Injecting SCSI controller device drivers into Windows when it fails to boot after converting it with.. Active Directory Step-by-Step: Disaster Recovery with a System State Backup (v 2003).

This many times before when migrating drives to different storage controllers. In my case I used VMWare for the simple reason the VMConverter can inject hard drive driver.. To boot Windows in hard disk connected to new SATA controller, you need The driver file.. How to load SATA drivers to offline Windows xp system - posted in Windows 2K/XP/2003: The reason: if I moved from one hardware to another and did not preload necessary drivers.
