- Available for download in english only.
- Product
- Download the installation package of Endoscope ViewPlayCap (Windows 7/8/10 PC).

Q: Regex find between 2 strings with whitespace in between I want to find all occurrences of the string between two other strings (only their values and no occurrence of them within the larger string). For example, I want to find all occurrences of "NY1":

```
NY1 NY2 NY3
```

The following works when there are no spaces in-between the numbers:

```
MatchCollection matches =  
Regex.Matches(str, @"NY1");
```

But I have a problem with spaces in-between the numbers:

```
NY1 NY2 NY3 NY4
```

The code above will find the occurrences of the string "NY4" instead. I tried the following to try and skip the whitespace problem:

```
MatchCollection matches =  
Regex.Matches(str, @"NY1",  
RegexOptions.IgnoreCase);
```

But this also doesn't work because it skips over "NY4"

(even though it's a separate string): NY1 NY2
NY3 NY4 How can I make it ignore
whitespaces and also match the occurrence of
the string between 2 other strings? A: I would
use the following regex: `var matches =
Regex.Matches(subjectString, "(?() .Select(m
=> m.Value); using (var sr = new
StringReader(subjectString)) { matches =
Regex.Matches(sr.ReadToEnd(), "(?`
